

ALM MSI Generator

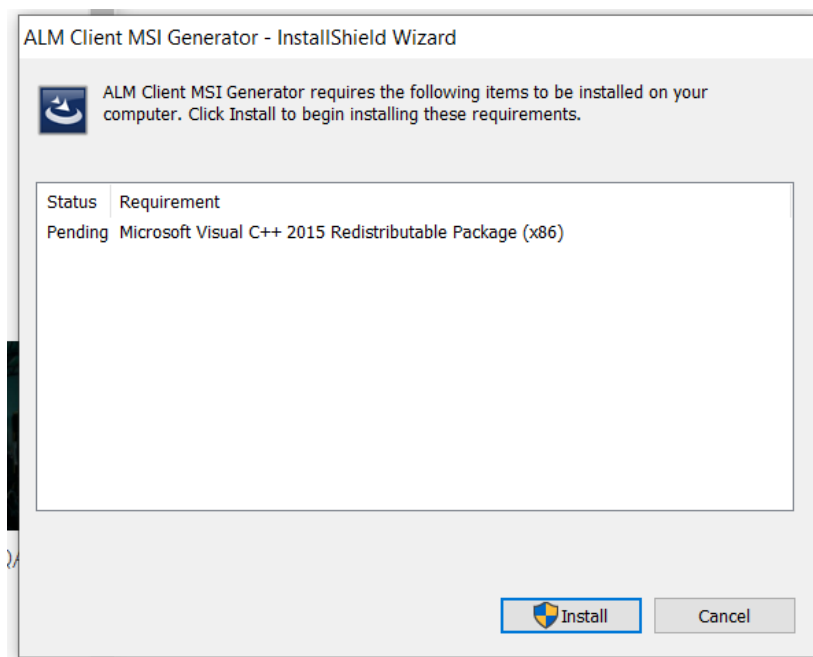

1. Download ALM MSI Generator Add-in from Micro Focus Market place.
Note – Need to have signed up to download Add-ins from Micro Focus market place.

<https://marketplace.microfocus.com/appdelivery/content/alm-client-msi-generator-add>

The screenshot shows the Micro Focus Marketplace page for the 'ALM Client MSI Generator Add-In'. The page includes a 'Description' section on the left with links for 'Suggested apps', 'Releases', and 'Reviews'. The main content area is titled 'Releases' and features a table with columns for 'RELEASE', 'SIZE', and 'DATE'. A single release is listed: 'ALM Client MSI Generator Add-In For ALM 16.0' with a size of '12.5 MB' and a date of 'Sep 16, 2021'. A 'DOWNLOAD' button is visible next to the release. Below the table, there are sections for 'PRODUCT COMPATIBILITY' (Application Lifecycle Management Version 16.01), 'RELEASE NOTES', and 'Installation Instructions and Prerequisites'. The installation instructions list four steps: 1. Prerequisite: Microsoft .NET Framework 4.0 or 4.5 must be installed; 2. Uninstall any other versions of this add-in; 3. Refer to the ALM Client MSI Generator User Guide; 4. Install this add-in on your ALM client machine. A note at the bottom states: 'Note: To install this add-in you must log in with administrator privileges'.

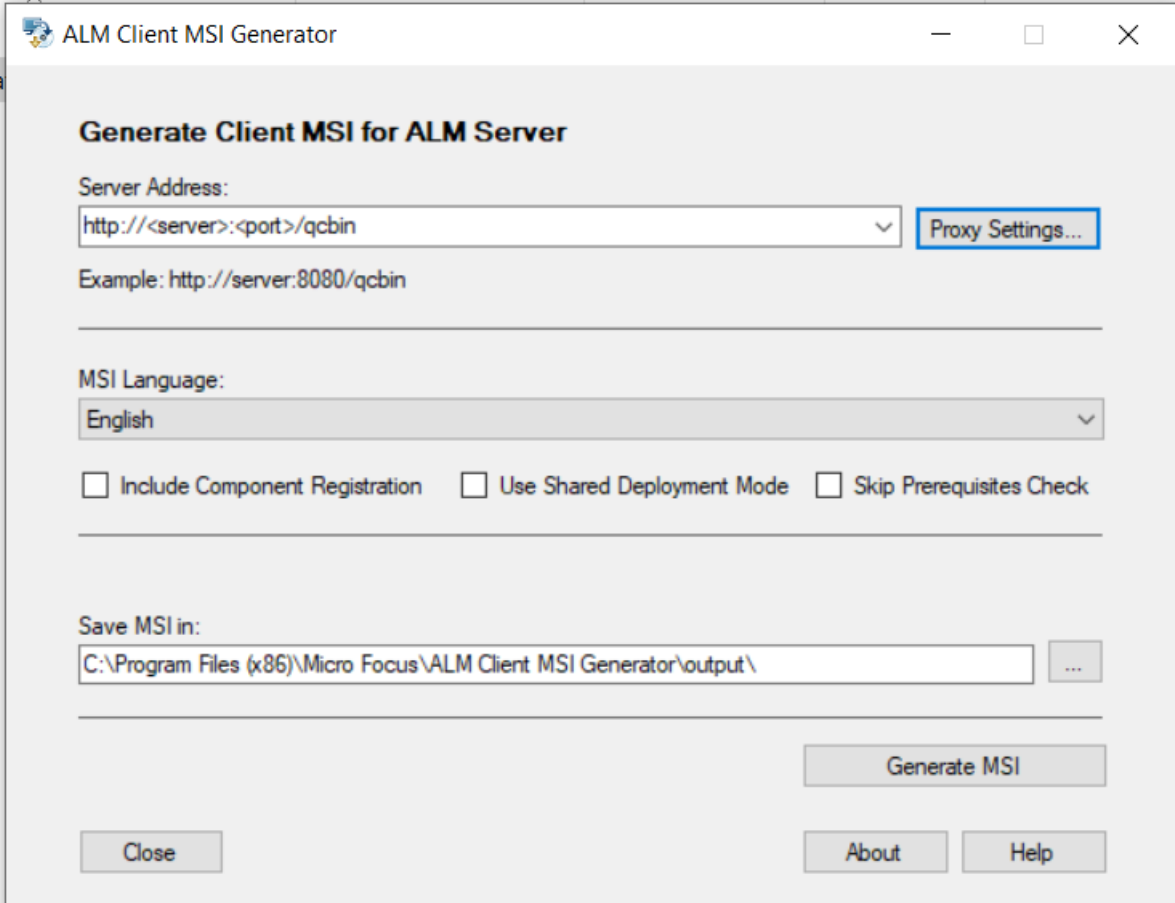

RELEASE	SIZE	DATE
ALM Client MSI Generator Add-In For ALM 16.0	12.5 MB	Sep 16, 2021

2. Install MSI Generator Add-in

3. Open MSI Generator as Administrator, fill the fields. If Client needs to be registered, do select Include component Registration option.

Click on Generate MSI

The screenshot shows the 'ALM Client MSI Generator' window. The title bar reads 'ALM Client MSI Generator'. The main heading is 'Generate Client MSI for ALM Server'. Below this, there are several input fields and checkboxes. The 'Server Address' field contains 'http://<server>:<port>/qcbn' with a dropdown arrow and a 'Proxy Settings...' button to its right. Below this is an example: 'Example: http://server:8080/qcbn'. The 'MSI Language' field is set to 'English' with a dropdown arrow. There are three checkboxes: 'Include Component Registration', 'Use Shared Deployment Mode', and 'Skip Prerequisites Check', all of which are currently unchecked. The 'Save MSI in:' field contains the path 'C:\Program Files (x86)\Micro Focus\ALM Client MSI Generator\output\' with a browse button ('...') to its right. At the bottom, there are four buttons: 'Close', 'Generate MSI', 'About', and 'Help'.
